Main Analysis	13
Robustness check	143

The following file contains step-by-step instructions, including code, required to replicate all tables and figures presented in, “The Participatory Implications of Racialized Policy Feedbacks.’’

There are three files associated with this project: 1) The abbreviated, clean datafile used in the analysis, “cmpse2016_pop.csv,’’ 2) The R markdown (.Rmd) file that includes all code developed to perform the analysis, and 3) the .pdf produced by the .Rmd file. Markdown is an R package, but familiarity with Markdown is not necessary to execute the code contained in the .Rmd file.
